

File Descriptions

- Case Documents

Description: Contains file folders for each case

- Case folders

Description: Contains all source documents (pdfs) for each case

- Document_Analysis

Description: Contain files for analyzing the source documents

- BERTopic_seed_analysis.py

Description: Runs the BERTopic pipeline on the converted source documents (.txt files) 11 times with different random seeds and compares across seed runs, or runs a grid search algorithm for parameter optimization. Outputs an excel sheet with the results of the seed sensitivity analysis or an excel sheet with the results of the grid search algorithm.

- single_BERTopic.py

Description: Runs the BERTopic pipeline on the converted source documents (.txt files) once and outputs an excel sheet with the results.

- parameter_optimization.xlsx

Description: Contains the output of the grid search parameter optimization algorithm

- seed_stability_analysis.xlsx

Description: Contains the output of the seed sensitivity analysis.

- single_BERTopic_results.py

Description: Contains the output of the single BERTopic pipeline run

- PDF_Extractor

Description: Contains files used to extract .txt files from .pdf files. *Developed by Kiro using Claude Sonnet 5*

- input_pdfs

Description: Contains .pdf files to be converted into .txt files. PDFs extracted by [teams_pdf_extractor.py](#) are sent here.

- output_text

Description: Contains .txt files converted from .pdf files

- pdf_extract

Description: Contains code files that implement the text extraction pipeline

- samples

Description: Contains folders for input/output testing

- tests

Description: Contains tests of the overall pipeline

- extract.py

Description: Contains code that calls the whole pdf extractor pipeline. Activate the pipeline here.

- teams_pdf_extractor.py

Description: extracts the PDFs downloaded from a Teams repository.

- README.md

Description: Contains a description of the PDF extraction pipeline and how to use it.

- requirements.txt

Description: Contains python package installation requirements
